

# Intro to C#

State ID: S0016P

## About this course

If you have every wanted to learn to code, C# is a great place to start your programming journey. C# is an object orientated programming language and will give the foundations of knowledge required to keep learning C# and many other languages.

### Gain these skills:

- Introduction to C# programming language
- Basic programming constructs
- Creating small stand-alone programs that are compatible with the Microsoft Windows environment

If you'd like to further your programming skills, complete this course and [Intro to Java](#), before applying to study the [Diploma of Software Development](#).

### Online study option

Are you interested in studying this course online? This course can run as fully online group study when there is demand. To express your interest, visit our [information technology online study](#) form.

## Overview

*This course will be offered with a blended, flexible delivery model to enable social distancing measures to be undertaken during the COVID-19 pandemic. This approach may include a mix of online and classroom based delivery, as well as practical and work experience placements. Lecturers will provide specific instructions to their student groups on how training will be undertaken.*
