

# Gas Safety

State ID: S0048P

## About this course

The Gas Legislation and Safety course comprises three components, WA Gas Regulations, Gas Safety and Basic Combustion and Flueing.

Successful completion of the final assessment will be needed to receive a completion letter that is required by Building and Energy to apply for a *Gas Fitting Permit to Work Under Supervision*.

The course is delivered over two days at Rockingham campus. Students who are unable to attend the Rockingham campus may discuss their training and assessment options with lecturing staff; off-campus options can usually be arranged.
