

Restricted Plumbers Licence

State ID: S0096P

About this course

Upon successful completion of this course, the participant will be able to obtain a restricted licence from the Plumbing Licensing Board.

A Restricted Plumbing Licence qualifies the holder to remove and replace water heaters and disconnecting, removing, installing and reconnecting compression unions, temperature/pressure relief valves and expansion control valves.

Scope of work authorised under a restricted plumbing permit:

There are two criteria for determining the type of plumbing work permitted to be carried out by the holder of a restricted plumbing permit.

Criteria 1

The plumbing work to be carried out must only be in the course of:

- removing a water heater; or
- removing and reinstalling a water heater; or
- replacing a water heater.

Criteria 2

The work to be carried out is limited to disconnecting, removing, installing and reconnecting:

- a compression union;

- b. a temperature/pressure relief valve; or
- c. an expansion control valve.

Only licensed electrical workers and licensed gasfitters are eligible to obtain a restricted plumbing permit.

Overview

This course will be offered with a blended, flexible delivery model to enable social distancing measures to be undertaken during the COVID-19 pandemic. This approach may include a mix of online and classroom based delivery, as well as practical and work experience placements. Lecturers will provide specific instructions to their student groups on how training will be undertaken.
