

PCAP Python Exam Preparation

State ID: S0106P

About this course

If you are new to IT and want to learn how to code, Python is one of the best languages to start your coding career journey. Python is a versatile language used across many industries from web and game development, machine learning, AI and DevOps.

The Instructor led PCAP: Programming Essentials in Python course will prepare you to take the PCAP - Certified Associate in Python programming exam, to certify your knowledge in this subject.

No prior knowledge in programming is required, but it is important that you have good computer skills so that you can get started quickly.

Overview

This course will be offered with a blended, flexible delivery model to enable social distancing measures to be undertaken during the COVID-19 pandemic. This approach may include a mix of online and classroom based delivery, as well as practical and work experience placements. Lecturers will provide specific instructions to their student groups on how training will be undertaken.
