

# Cisco CCNA : Introduction to Networks

State ID: S0121P

## About this course

Come and study your Cisco **CCNA R&S: Introduction to Networks**

Use our state of the art lab environment to learn from expert trainers in how to use configure and master Cisco to get you started on your Cisco journey.

Cisco is an industry standard, and recognised world wide. If you want to be successful in an IT career Cisco training can help.

**CCNA R&S: Introduction to Networks** First step toward a networking career

Begin preparing for a networking career with this introduction to how networks operate. This includes learning the architecture, structure, and functions needed to support the operations and priorities of Fortune 500 companies to small innovative retailers. You will even get the chance to configure a network yourself, such as a simple LAN (Local Area Network). After completing this course, you will have a working knowledge of routing, switching, network applications and protocols. This is the first course in a 4-course series designed to prepare you for entry-level networking jobs. No prerequisites required.
