

CCNA v7 Introduction to Networks

State ID: S0136P

About this course

Your first step toward a networking career

Begin preparing for a networking career with this introduction to how networks operate.

This first course in the 3-course CCNA series introduces architectures, models, protocols, and networking elements – functions needed to support the operations and priorities of Fortune 500 companies to small innovative retailers.

You'll even get the chance to build simple local area networks (LANs) yourself.

You'll have a working knowledge of IP addressing schemes, foundational network security, and be able to perform basic configurations for routers and switches.

Dates of next courses:

- 27 July to 22 September
- 6 October to 8 December

Overview

This course will be offered with a blended, flexible delivery model to enable social distancing measures to be undertaken during the COVID-19 pandemic. This approach may include a mix of online and classroom based delivery, as well as practical and work experience placements. Lecturers will provide specific instructions to their

student groups on how training will be undertaken.
