

Cyber Security Essentials

State ID: S0138P

About this course

Learn the basics needed to fight cybercrime

A single breach can have huge consequences for a company's ability to function, hurting the bottom line and causing disruption in the daily lives of millions of people. This is why the demand for security professionals continues to grow.

Get onboard—and develop an understanding of cybercrime, security principles, technologies, and procedures used to defend networks.

Then decide whether you want to pursue an entry-level networking or security role professionally.

This course is recommended for students planning to study for the [CCNA](#) or [CyberOps Associate](#) Certifications.

Overview

This course will be offered with a blended, flexible delivery model to enable social distancing measures to be undertaken during the COVID-19 pandemic. This approach may include a mix of online and classroom based delivery, as well as practical and work experience placements. Lecturers will provide specific instructions to their student groups on how training will be undertaken.

Semester 1, 2020
