

Intro to Java

State ID: S0147P

About this course

As one of the most in demand programming skills globally, Java is a great language to start you on your programming career journey.

Java is an object orientated programming language and will give the foundations of knowledge required to keep learning Java and many other languages.

Gain these skills:

- introduction to the Java programming language
- basic programming constructs
- creating small stand-alone programs that are cross platform compatible

If you'd like to further your programming skills, complete this course and [Intro to C#](#), before applying to study the [Diploma of Software Development](#).

Online study option

Are you interested in studying this course online? This course can run as fully online group study when there is demand. To express your interest, visit our [information technology online study](#) form.

Overview

This course will be offered with a blended, flexible delivery model to enable social distancing measures to be undertaken during the COVID-19 pandemic. This approach may include a mix of online and classroom based delivery, as well as practical and work experience placements. Lecturers will provide specific instructions to their student groups on how training will be undertaken.
